

Scope and Purpose

- a) This document will address readiness with respect to Acceptance.
- b) The Review Recorder will be responsible for documenting the information gathered at the readiness review meeting to produce this document.
- c) Please complete this checklist during the Acceptance Readiness Review to verify all preparatory work has been completed and all requirements specified under Clauses 7.2 (Acceptance) and 7.3 (Derogation from requirement to issue a Provisional Acceptance Certificate) of the Agreement have been complied with to allow the Company to issue a Provisional Acceptance Certificate with respect to the New Train.

The Acceptance Readiness Review is conducted to determine if the New Train under review is ready to be made available for Acceptance by deciding whether the activities are complete and verifying their compliance with the requirements of the Agreement.	
Review Date:	08/05/2024
Scheduled Acceptance Date:	31/05/2024

Acceptance Readiness Review Checklist - Activity Description						
Category	Description	Outcome				Evidence
		Yes	Yes with Conditions	No	N/A	
Acceptance Tests	Has the New Train completed and passed all its initial and (as relevant) all repeat Acceptance Tests?		✓			Please refer to Appendix "A"
Fleet Defect/Potential Fleet Defect	Has the Company notified the Contractor of a Fleet Defect or a Potential Fleet Defect (as applicable)?	✓				Notified under cover letters PRA-GIB-MSA-0440, PRA-GIB-MSA-0442, PRA-GIB-MSA-0453, PRA-GIB-MSA-0501, PRA-GIB-MSA-0523 and further notification to follow. To be rectified under relevant Fleet Defect Rectification Plans.

N

Acceptance Readiness Review Checklist - Activity Description						
Category	Description	Outcome				Evidence
		Yes	Yes with Conditions	No	N/A	
Quality Assurance	Have all stage inspections listed in the Quality Assurance Plan been carried out and correctly witnessed?	✓				All stage inspections, pursuant to clause 7.2.4 of the Quality Assurance Plan, are listed with associated evidences, in the EM 01 20 216 Data Book. Open points are also in the attached spreadsheet in Appendix "B"
Necessary Consents	Have all Necessary Consents in respect of the New Train, to enable its entry into revenue earning service and operation (without any restrictions, qualifications and/or conditions) on the Relevant Network at normal line speeds up to a maximum of 120 (one hundred and twenty) kilometres per hour, been obtained by the Company?	✓				The applicable Necessary Consents for the Limited Service between Pretoria and Piensaarspoort stations are included In Appendix "C"
Deliverable Materials	Have the relevant parts of the Deliverable Materials relating to the manufacture, testing and quality assurance of the New Train, or relating to the training of personnel in relation to the operation and maintenance of the New Train (including all relevant Manuals) been received by and to the satisfaction of the Project Manager (having regard to the advice of the Testing Agent)?	✓				Refer to the attached Deliverable Materials checklist in Appendix "D"

Email: helpdesk@rsr.org.za | Twitter: Rail Safety | Facebook: Railway Safety Regulator | Website: www.rsr.org.za

A meeting was convened with PRASA representatives on Monday the 16th of January 2017 and the RSR conducted a readiness inspection of the rolling stock and infrastructure between Rissik and Pienaarspoort stations on the 17th, 19th and the 27th of January 2017.

The following is hereby offered in response to the request:

Life cycle phased Approvals

In granting Approvals for projects, the RSR follows a process whereby approvals are granted at distinct gates at the commencement life cycle phases. An Approval was granted for the Testing and Commissioning phase of this project; as part of this approval, the RSR granted a further permission to allow for trials of the new trainsets without commuters. The life cycle phase following Testing and Commissioning is for allowing revenue service operation- the Operations and Maintenance phase. Although limited in its scope, the RSR regards the intended limited service operations between Rissik and Pienaarspoort stations as a revenue earning operation. All matters related to this phase of the project must be addressed to the RSR's satisfaction through established processes.

Corridor Modernisation Programme

The new rolling stock acquisition project is part of a wider corridor modernisation programme. The objective of this programme is a realisation of a modern, safe and reliable commuter service. The RSR has noted several projects that have been identified as essential for the envisaged service that are currently in progress. Some of these projects are at an advanced stage and it is encouraging that they are planned to be completed before the planned commencement date of the full service operations. These include repositioning of access verification points, ISAMS, stray current mitigation, fencing and platform rectification.

Corridor Specific Risk Mitigation

The RSR was involved in an extensive review of the hazard log developed for all phases of the rolling stock operation. However, the application by PRASA for the limited service is inadequate as it was not supported by a corridor specific risk assessment.

Noting the above, the RSR hereby approves with immediate effect PRASA's application to commence with the limited service between Pienaarspoort and Rissik on the proviso that the special conditions attached to this letter are addressed and concluded.

PRASA is urged to consider issues raised in this letter and to examine, meticulously, all other pertinent systemic issues that may impede an introduction of a service that offers improved levels of customer experience, safety and reliability in line with the expectations of all stakeholders.

The RSR commits to support PRASA endeavours to introduce the service in a reasonable time.

Yours Faithfully

A handwritten signature in black ink, appearing to read 'B. Mqoco', is placed over a light blue rectangular background.

B. Mqoco

Executive: Technical Services

SPECIAL CONDITIONS FOR THE LIMITED SERVICE BETWEEN PIERNAARSPOORT AND RISSIK STATIONS

To be addressed with the RSR by Friday, 3 February 2017:

- Interchange operations at Koedoespoort station.
- During trial operations, Passenger rescue and evacuation was only done at stations. PRASA to conduct a rescue and evacuation test on the mainline.
- High risk level crossing at Pienaarspoort – RSR Inspectors observed that flagmen were not deployed to the level crossing on the 19th and the 25th of January 2017.
- PRASA acknowledged the risk of PTI incidents along the body of the vehicles (away from the doors) and plans to deploy platform marshals as one of the planned mitigations. The RSR requires a Resource Matrix per station with their roles and responsibilities. The document must also indicate the period for which this resources will be deployed at different stations.

In light of the above, PRASA is further instructed to address and conclude with the RSR the following short term conditions by 30 March 2017.

- PRASA has identified inadequacies in the availability of recovery teams for failure management.
- Management of access for passengers with reduced mobility on the corridor must be resolved-where supplied, elevators are not yet operational.
- The Trial Operations on the intended corridor revealed shortcomings in the current station operating model. Minimum requirements for operable station systems/equipment be established.
- The trial operations has also revealed minimum decision requirements for deployment of Rolling Stock from the depot. Minimum requirements for releasing Rolling Stock to be established.

Contract Title: Technical Support and Spare Supply Agreement
Subject: PAC readiness – Warehouse storage for Capital spares and special tools and test equipment - Confirmation letter

Dear Sir,

The provision of a warehouse storage for the first batch of capital spares, special tools and test equipment for the New Train, supplied under the Technical Support and Spare Supply Agreement (TSSSA) by Gibela Rail Transport Consortium RF (Pty) Ltd has been reached by mutual agreement between the Contractor and the Company; whereupon agreeing the type and quantity of the first batch of Capital Spares in accordance with Schedule 1 and clause 14.2 of the Manufacture and Supply Agreement (MSA), the Contractor (Gibela) delivered to the temporary Delivery Point in Alstom's Ubunye facility in Nigel. This is a temporary arrangement until the Depot Modernisation project for the Braamfontein Rolling Stock depot is concluded or an alternative warehouse strategy is proposed and agreed.

The first phase of the first batch of Capital spares has been validated by both the Contractor and Company teams and is in the process of being paid for by the Company Project team. The second phase of the first batch is being delivered and will be validated once all parts have arrived.

The temporary delivery point in Alstom's Ubunye facility in Nigel, will be sufficient to keep spares, special tools and test equipment to perform the relevant maintenance activities. The Company (PRASA) shall use its reasonable endeavours to store such Spares in a manner compliant to their specialist requirements (as advised by the TSSSA Supplier acting reasonably). The current capital spares available will be sufficient to accommodate the first 18 train sets needs for the next 18 months for any insurance related incidents.

Please feel free to contact me if you require further information or clarification on any of the above.

Yours faithfully,
